The Seneca AIM EIS Fund

INFORMATION MEMORANDUM

Important information

The Seneca AIM EIS Fund is an Alternative Investment Fund for the purposes of the Alternative Investment Fund Managers Directive. It is not a collective investment scheme within the meaning of section 235 of the Financial and Services Market Act nor a Non-mainstream Pooled Investment by virtue of it being a fund complying with the meaning of Article 2 in the Schedule to the Financial Services and Markets Act 2000 (Collective Investment Schemes) Order 2001.

As the Alternative Fund Manager for the Fund, Seneca Partners Ltd complies with the requirements referred to in IPRU-INV 11.3.11G (Professional negligence) by having suitable Professional Indemnity Insurance in place.

If you invest in the Seneca AIM EIS Fund, your money will be at risk. This means that you may get back less than you invest.

Whilst Seneca's aim is for the Fund to generate growth, it is a high-risk investment and there is no guarantee that your investment will grow in value.

After the deduction of certain fees (as detailed on page 22), your Subscription will be used to buy shares in companies whose shares are quoted on the Alternative Investment Market ("AIM").

The Fund may not be suitable for all potential Investors. Investments in AIM quoted companies generally carry a high degree of risk and you should consider the Risk Factors set out on pages 24 to 25 in this Information Memorandum carefully.

Before you decide to invest, please make sure that you understand the contents of this Information Memorandum and are satisfied that this is a suitable investment for you, bearing in mind your own personal circumstances

Whilst every effort is made to ensure that all shares purchased will qualify for the tax reliefs available under the Enterprise Investment Scheme, Seneca cannot guarantee that these reliefs will be granted or maintained for the life of your investment.

Please remember that tax rules and regulations may change and in doing so may affect your eligibility for some or all of the tax reliefs currently available. In addition, the qualification for and benefits of any tax reliefs will depend on your personal circumstances.

Seneca does not offer or give advice on investments, taxation or legal matters. You should seek advice from a qualified Financial Adviser before making any investment decision.

Seneca have made every effort to ensure that the content of this Information Memorandum is accurate and that it is presented in a fair and clear way. Seneca does not accept responsibility for any reliance placed on any opinions expressed in this document or liability for information obtained from public or third-party sources. This Fund is designed for UK investors only.

This financial promotion has been approved by Seneca Partners Ltd which is authorised and regulated by the Financial Conduct Authority (583361).

Seneca Partners Ltd's registered office is at **9 The Parks, Newton-Le-Willows, WA12 0JQ.**

All figures and information provided within this document are correct as at April 2021, unless otherwise stated. Seneca reserves the right to update this Information Memorandum from time to time.

The Enterprise Investment Scheme - in a nutshell

The Enterprise Investment Scheme ("EIS" or "Scheme") was introduced in 1994, as a way of encouraging investment into smaller UK companies ("SMEs"). There have been a number of changes to the scheme over subsequent years and there are a number of conditions that must be met in order for an investment to qualify under the Scheme. Many of these apply to the investee company and include that the investment must usually be made within 7 years of the company's first commercial sale (albeit there are certain cases where investments made outside of this period could qualify) and it must be used for business growth and development.

From an investor's point of view, one of the key conditions is that you must hold EIS qualifying shares for at least 3 years in order that they maintain their qualifying status. If the company you have invested in commenced its qualifying trade after the date you invested, you must hold the shares for three years from the date that qualifying trade commenced. Also, if you have a previous involvement with a company, you should take further advice before investing in it (as any existing investment you have made in that business may prevent EIS qualification being granted on any new shares issued to you).

In order to qualify under the Scheme, an investment must meet the "risk to capital" condition. Basically, you must be genuinely at risk of losing more than the value of any tax reliefs you might receive.

Due to the high risk of capital loss and the fact that it can be difficult and time consuming to sell shares in smaller companies, if there is no willing buyer, the Scheme offers investors the ability to claim a number of different tax reliefs.

These include:

- **Relief against Income Tax, equivalent to 30% of the purchase cost of the EIS qualifying shares.** This can only be claimed against Income Tax actually paid or due in the Tax Year in which the shares are purchased, the previous Tax Year or a combination of both.
- **EIS qualifying shares should qualify for Business Relief.** If you leave shares that qualify for Business Relief to your beneficiaries and have owned them for at least two years at the time of your death*, no Inheritance Tax should be due on the value of those shares.

****This qualifying period may be less where your Subscription has previously been held in another asset that qualified for Business Relief. Please speak to your tax adviser for further information.***

- **The ability to defer payment of Capital Gains Tax (“CGT”)** on a gain made in the period that runs from three years prior to one year after the purchase of the EIS qualifying shares. CGT deferral is available to individuals or trusts, regardless of whether they are in a position to benefit from income tax relief under the EIS scheme. Any gains deferred will come back into charge on the disposal of the EIS investment.
- **No Capital Gains Tax will be due on the gain made** where the EIS qualifying shares are sold for a profit, as long as you have held the shares for more than 3 years. (If the company started trading after you purchased your shares, you must hold them beyond the third anniversary of the date the company commenced trading).
- **Loss Relief is available** against Income Tax or Capital Gains Tax due or paid, where the EIS qualifying shares are sold for a loss. It should be noted that any loss is calculated by comparing the sale proceeds with the purchase cost net of any Income Tax relief received that is not repayable.

From an investor's point of view, one of the key conditions is that you must hold EIS qualifying shares for at least 3 years in order that they maintain their qualifying status.

Why Invest in UK SMEs?

Small and Medium-sized Enterprises (SMEs) represent over 99% of all private sector businesses in the UK, employing 16.6 million people (60% of the private sector workforce) and generating £2.2 trillion of turnover.* SMEs therefore have an important role to play in driving growth in the UK economy, opening new markets and creating jobs.

However, SMEs continue to struggle to access finance from traditional sources to help fund the growth of their businesses. Seneca is a business dedicated to and specialising in funding and advisory services for SME's and our reputation, strong professional intermediary network and geographical footprint gives us access to several hundred investment opportunities for review each year. From these, we select only what we consider to be the best and most appropriate.

Why focus on just AIM quoted companies?

In recent years, there have been a number of changes to the qualifying criteria for companies seeking to raise capital via the Enterprise Investment Scheme. These changes have meant that investing in these companies tends to come at an earlier stage of their development than it used to, increasing the risk profile of EIS as an investment class and potentially resulting in investors having to hold their investment for longer (7 to 10 years in some cases) due to having joined the company's "growth journey" earlier than they previously would have done.

Whilst the UK Government's objective of providing growth funding to businesses remains well targeted, the 30% Income Tax relief available under the EIS becomes less attractive over this longer timeframe especially when investors have most likely previously seen EIS as a 5-year investment. The Income Tax relief benefit is effectively halved to 3% p.a (if you compare a 10 year term to a 5 year term).

Additionally, many EIS providers openly state that their exit strategies for investors are likely to be via trade sale or an Initial Public Offer ("IPO"). However, It is not always easy to achieve trade sales for values that are significantly higher than the original investment cost. Equally, the likelihood of a future IPO cannot always be easily foreseen at the point the original investment is made. A number of positive things need to happen for an IPO to be a realistic exit vehicle.

By only investing in companies already quoted on the Alternative Investment Market ("AIM") or those taking part in a current IPO or Placing, we are seeking to remove that element of uncertainty. Being quoted on AIM provides daily pricing for a company's shares and inherently accurate valuations when compared to privately owned businesses but crucially, it usually carries better liquidity: a valuable contributory factor when looking to exit an investment.

The regulatory reporting requirements associated with an AIM quoted company also provides investors with regular updates and information about their investments.

The strategy for the AIM EIS Fund looks to take advantage of the liquidity and potential exit points shortly after expiry of the 3-year EIS qualification period, which should enable investors to recycle their investments and utilise the initial tax reliefs more quickly and effectively than may be the case with an investment that takes closer to 10 years to realise.

About Seneca Partners

Formed in 2010, our team brings together decades of experience in providing innovative investment solutions for investors, focused on benefiting from a variety of well-established tax reliefs. Seneca Partners currently has in excess of £110 million of tax advantaged investments which includes the Seneca EIS Portfolio Fund, the Seneca EIS Portfolio Service, Seneca Growth Capital VCT, three Managed Storage EIS Funds and the Seneca IHT Service.

Seneca is an award-winning specialist SME investment and advisory business. Headquartered in the North West of England, the management team have extensive experience across a range of sectors, including private equity, corporate finance, wealth management, accountancy and stockbroking. Seneca won "Alternative Finance Provider" in both 2016 and 2017 at the North West Business Insider Awards as well as 'Sub £10 million Deal of the Year' in 2016 in respect of an EIS investment in a North West based business. Seneca won the 2018 Investment Week Tax Efficient Award as Best New VCT Entrant and in June 2020 was shortlisted for the 2019 sub £200 million UK Market Cap VCT Manger of the Year.

Seneca's fund management activities are complemented by its mid-market corporate advisory practice which specialises in advising corporates, management teams and investors on a wide range of corporate finance related transactions ranging from fundraisings for early stage businesses, through to lower mid-market sales and buy-outs with typical target deal sizes ranging from £5 million to £50 million.

Seneca is also the founding member of a similarly branded network of companies which includes Seneca Bridging, a specialist property development and bridging finance business with assets of over £25m and Seneca Property Investments Limited, which currently manages in excess of £75 million of property assets. One of Seneca's core activities is the provision growth capital equity funding to small and medium sized businesses in the UK. Through the Fund's previous guise as our EIS Portfolio Service, over £60 million of funding has been provided in more than 100 separate investment rounds.

Seneca's role in the AIM EIS Fund

Seneca Partners is the manager of the AIM EIS Fund and will be responsible for the administration and management of each investment the Fund makes. It will also monitor the trading activities of the companies in which the Fund has invested, to check whether they remain on track to deliver investor returns and maintain their EIS qualifying status.

Keeping in touch

We believe that we should be accessible to any of our investors. Rather than use a call centre, we have our own in-house Client Relationship Team based in our Haydock Office.

You can:
Call us on 01942 271746,
or email us at:
clientteam@senecapartners.co.uk

How the Seneca AIM EIS Fund works

The Seneca AIM EIS Fund builds on the success of our EIS Portfolio Service and our proven credentials in selecting AIM EIS qualifying opportunities. We are looking to raise £5 million and seek to invest in 5 to 10 AIM quoted EIS qualifying companies in the 12 months following the closure of each tranche.

When you Subscribe to the Fund, your Subscription will be held in cash by the Custodian, helping build a sum of money for the Fund to invest (an "investment tranche").

We will complete a number of "soft closes" as funds are raised, so that we can start making investments for all those investors' who have invested by that date of each close.

The Fund will remain open for further Subscriptions until we have raised £5 million, at which point we will close the fund, with any funds received since the last "soft close" forming the final "investment tranche".

Once your Subscription is included in an "investment tranche", we will begin buying shares on your behalf, usually in five to ten investee companies. These shares are expected to qualify for the tax reliefs available under the Enterprise Investment Scheme.

Investee companies will be those with shares quoted on the Alternative Investment Market ("AIM"). A typical portfolio will likely include a mixture of holdings in more established companies and some earlier stage businesses, all seeking capital growth. However, the Fund does not invest in start-ups. We will consider investing in most industry sectors, though the drive in the wider economy towards tech solutions accelerated by the global impact of coronavirus is increasing. Tech solutions, digital analysis software, e-commerce and life sciences are likely to feature strongly in our pipeline of investment opportunities as more businesses embrace technology as a way of becoming more resilient for the future.

Our aim is that you hold each investment for no more than four years. The default position will be that we will automatically reinvest any exit

proceeds within 12 months as a part of the next available investment tranche. However, as each exit occurs, you will be given the opportunity to ask to have the proceeds returned to you.

Advance Assurance

HMRC will only confirm that an investment qualifies under the Enterprise Investment Scheme after it has been made. However, an investee company can seek Advance Assurance (where HMRC agrees that an investment appears to meet the qualifying conditions) before an investment is made. As a part of our pre-investment due diligence work, we ensure that Advance Assurance has been given.

Our target market

We have designed our AIM EIS Fund to appeal to investors' who are looking to invest in UK SMEs with the aim of achieving capital growth over the shorter to medium-term (four years) in an investment that qualifies for the tax reliefs available under the Enterprise Investment Scheme.

They will be a High Net Worth Investor (as defined by the FCA) and will have experience of investing in tax advantaged investments (e.g. EIS, VCT) or buying shares in FTSE 100, FTSE 250, smaller quoted (e.g. the Aquis Stock Exchange), AIM or unquoted companies.

Those investors' will understand what factors drive the movement of share prices and how in turn that impacts the value of their investment. They will also understand and accept the risks associated with making an investment in the Fund (see pages 24 to 25). Their current financial situation will mean that they do not need access to the amount they invest for at least five years or need an income from it. They should also be able to withstand the loss of some or all of that amount.

You should not invest in this Fund if you lack the requisite knowledge and experience, are looking to invest for less than four years, need your investment to pay an income or are risk averse or have a low tolerance to risk.

The aims of the Fund

We have four aims for the AIM EIS Fund:

- To invest your money in such a way that it should qualify for the tax reliefs available under the Enterprise Investment Scheme (please see the "Early exits" section on page 10).
- To invest your money into the shares in five to ten companies from a number of different industry sectors.
- To generate a return of 1.5x the amount invested on your behalf within 4 years net of fees, excluding any tax reliefs you may receive.*
- To reinvest any exit proceeds in such a way that they should qualify for further tax reliefs under the Enterprise Investment Scheme (unless you instruct us to the contrary)

We only invest in companies that we believe will help us achieve these aims.

Reinvestment of Exit proceeds

In most cases the default position will be that we will automatically reinvest any exit proceeds within 12 months at a reduced initial fee. However, should you prefer that we did not reinvest your proceeds, you will be given the opportunity to ask us to return the proceeds to you as each exit occurs.

Reinvestment will be achieved by including your exit proceeds in the next available "investment tranche".

If your circumstances change

Please be aware that you must hold your shares for at least 3 years in order to qualify for the tax reliefs available under the Enterprise Investment Scheme. You should therefore only invest if you are certain that you will not need access to your investment for at least 4 years.

The Fund is looking to raise a total of £5 million and will close once that amount is raised.

****Please note that target returns and timescales are not guaranteed. Your capital is at risk, you may get back less than you invest and it may take longer than anticipated to exit all of your investments.***

Claiming your tax reliefs

As with most EIS investment vehicles, the Fund itself has not sought approval by HMRC under section 251 of Income Tax Act 2007. Instead, each investee company obtains Advance Assurance prior to investment and permission to issue EIS 3 certificates after investment.

This means that you may only claim EIS income tax relief in the tax year in which each investment is made on your behalf, (or the previous tax year if you elect to carry back some or all of the relief), rather than in the tax year in which you subscribe to the Fund (if that differs).

In order to claim tax relief following the purchase of EIS qualifying shares, you will need an EIS 3 certificate from each of the companies you have invested in. As already mentioned, a company in which you are invested can only apply to HMRC for permission to issue your EIS 3 certificate after your shares have been allotted following your investment. (It must also have been undertaking a qualifying trade for at least 4 months before doing so). It can take HMRC some time to issue permission for a company to issue EIS 3 certificates. We expect most of your EIS 3 certificates will be issued within 6 months of the date your shares are purchased but it can take longer.

Please remember that whilst you cannot claim any EIS tax reliefs for an investment until you receive your EIS 3 certificate, the key date is the date your shares were allotted not the date the EIS 3 certificate was issued.

Claims for tax reliefs must be made within 5 years of the 31 January following the Tax Year in which the relevant investment is made. (A Tax Year runs from 6 April to 5 April).

An example of how the Seneca AIM EIS Fund works

“How Philip can reduce this year’s tax bill by £25,000”

We’d like to introduce you to Philip. He is 52 years old and married with two sons at University. He earns £90,000 p.a. as a Senior Manager.

Philip has a personal pension fund of £620,000 and investments worth £280,000. In addition, he has £125,000 in his bank account as a result of recently selling one of his investments. In selling this investment, Philip made a capital gain of £50,000 more than his Capital Gains Tax allowance for the year.

In a recent review with his financial adviser, Philip enquired about the Enterprise Investment Scheme, as he had heard that it was a way in which he could defer paying Capital Gains Tax on his capital gain and also obtain some Income Tax relief.

During the review, it was established that Philip:

- Is a UK taxpayer;
- Is comfortable making an investment for a 4 to 5 year period;
- Is comfortable investing a small portion of his overall wealth in a portfolio of younger, smaller companies that are quoted on the Alternative Investment Market (and therefore have a higher risk profile); and
- Has no private equity type investments in his current portfolio and is happy to include some.

His financial adviser has recommended that he consider investing £52,000 in the Seneca AIM EIS Fund. This amount has been suggested as it represents less than 10% of Philip’s portfolio and the amount available for investment (after the deduction of initial fees) will exceed the amount of the gain he has made:

Subscription	£52,000.00
Initial Fee	-£1,248.00
Custodian Fee	-£210.00
Dealing Fees	-£60.65
Available for investment	£50,481.35

If we assume that the full amount available for investment is used, the following comparison shows how much tax Philip can save or defer:

Tax due (based on 2021/22 tax rates)		No investment made (i.e. current position)	£52,000 invested in the Seneca AIM EIS Fund
Income Tax:			
£12,570 (personal allowance)	0%	£0.00	£0.00
£12,570 to £50,270 (basic rate tax)	20%	£7,540.00	£7,540.00
£50,270 to £90,000 (higher rate tax)	40%	£15,892.00	£15,892.00
Income Tax relief on £50,481.35	30%	£0.00	-£15,144.40
Capital Gains Tax	20%	£10,000.00	£0.00
Total tax due		£33,432.00	£8,287.60
Tax saved or deferred			£25,144.40

The net cost of making this investment is therefore £26,855.60 (being £52,000 - £25,144.40).

Philip's adviser explains that as EIS qualifying shares represent a high-risk investment, in addition to the tax reliefs available upon investment, it is possible to claim Loss Relief should any of the shares be sold for a loss. In the unlikely event of a worst-case scenario, where all of the companies he is invested in fail over the term of his investment (let us assume this to be 4 years in this example), Philip should be able to claim Loss Relief against the previously deferred Capital Gains Tax, which would otherwise have fallen due for payment. Alternatively, Philip might be able to claim Loss Relief against Income Tax (assuming his income remained at the same level):

Cost of EIS shares	£50,481.35.	Whilst the previously deferred Capital Gains Tax would fall due for payment (assumed to still be £10,000 albeit perhaps less if he has no other gains in the year of disposal), the loss relief against Income Tax would in this example be £4,159.04 higher, bringing the total tax saved or deferred to £29,303.44.
Dealing Fees (Purchase)	£60.65	
	£50,542.00	
Income Tax relief	-£15,144.40	
Net Loss	£35,397.60	
Loss Relief @ 40%	£14,159.04	On this basis, Philip's maximum overall loss would be £22,696.54 (being £52,000 - £29,303.44).

The companies we invest in

Potential investment opportunities are introduced to us through our network of regional contacts that includes experienced professionals, entrepreneurs, corporate contacts and intermediaries. Looking specifically at those that are quoted on AIM, a large proportion of deals are introduced by non-executive directors and strategic advisors.

When considering investment opportunities, we are looking for businesses that have or offer:

- A strong underlying business with attractive growth prospects
- A defensible market position
- Well-funded businesses with resilience to wider economic challenges and threats
- A realistic entry valuation underpinned by progress to date and achievable financial forecasts
- A strong and proven management team
- Validated pipeline of potential future news flow opportunities and value inflexion points
- The ability and desire to transact promptly

Many of the investment opportunities we receive do not meet these investment criteria and therefore are not considered beyond the initial review phase

Our due diligence process

Those businesses that meet these criteria are then subject to a detailed due diligence process which is designed to identify issues that may not be apparent on initial review. There are three stages to this process:

1. The first stage consists of producing a summary of the opportunity including key features, market analysis, possible entry price, exit strategy, potential returns and key due diligence issues. These initial high level findings are discussed by Seneca's Investment Committee who will then decide whether the opportunity should progress to the second stage. Typically for an AIM deal this is performed at the time of an initial conversation with management, or alternatively an advisor, broker or research analyst. The Seneca team also regularly hold these discussions with AIM quoted businesses that aren't currently raising funds, to ensure we have a detailed backfile of businesses we know and like as and when investment opportunities arise.
2. The second stage consists of a more detailed investigation of the opportunity. This involves the preparation of an investment paper which will be supported by the findings of the due diligence undertaken including any legal, commercial, management and financial considerations. For AIM deals there will also be additional consideration of the company's track record since initial floatation and a detailed assessment of progress made versus market expectations. This stage also includes the obtaining of Advance Assurance (i.e. confirmation from HMRC that the proposed share issue should qualify under the Enterprise Investment Scheme).
3. Following a further review by the Investment Committee, incorporating follow up questions and considerations generally covered off through additional discussions with management, there will be some further conversations with both the company and the advisors involved to get a feel for how the funding round is being built up and at what value. The structure of our proposed investment will be finalised and terms agreed. A final summary of the proposed investment is provided to the Fund Manager for approval and subsequently an order is placed with the broker responsible for building the book.

On-going management

The Fund Manager is responsible for collecting appropriate management information and reporting this to the Investment Committee on a monthly basis. Our in-house expertise in monitoring the AIM market, together with our strong broker relationships and regulatory company reporting, gives a clear line of sight on how these businesses are performing, trading volumes, changes to major shareholdings and how that

relates to a company's current and future valuation prospects. Regular dialogue is maintained with both the broker community and direct with management teams, meaning in depth analysis and a well-informed assessment of the latest developments can be formed at the time of any material announcements made to the market. We are also able to realise partially depending on liquidity or potentially to retain the balance.

Experienced growth capital team

Our growth capital team has provided over £130million of tax advantaged equity to some of the UK's brightest businesses through the Seneca EIS Portfolio Fund, the Seneca EIS Portfolio Service and the Seneca Growth Capital VCT.

Maintaining strong relationships with national UK stockbrokers and NOMADS, we see a very regular stream of AIM quoted EIS qualifying investment opportunities. We have invested across a broad range of sectors but always influenced by

valuation metrics where we feel the best opportunities lie for delivering capital appreciation for our investors. On this basis we stand back from those where we feel values are over inflated when weighed against the dynamics and financial performance. This approach has served us well (please see our historic performance below).

15

The historic performance of our investments in AIM quoted shares

To date, we have invested over £24 million in 22 AIM quoted businesses through our EIS Portfolio Service¹. Since our first exit in November 2015, we have generated £23.6 million of exit proceeds for our investors with a further £19.1 million of unrealised investments still held¹. The total of £42.7m¹ represents a combined value of £1.78 per £1

invested before charges and any tax reliefs² (all figures as at 28th May 2021). If these exit proceeds had been generated from within this fund, they would have been subject to our realisation fee (4% + VAT), broker fee of 0.2% and a dealing fee of 0.1% + VAT (see pages 22 and 23 for further details).

¹ As this is a new fund, we have not yet completed any exits from it. We have therefore used our wider exit track record as a simulated performance for this fund.

² Past performance is not a guide to future returns. Your capital is at risk, you may get back less than you invest.

Examples of previous investments in AIM quoted companies

Gear4music PLC

Launched in 2003, Gear4music Ltd has become one of the largest retailers of musical instruments and equipment in the UK, having over 300,000 registered customers. In 2012, the company also launched Gear4music in 15 different languages and are now one of the fastest growing music companies in Europe, with 18 country specific websites.

Gear4music was admitted to the Alternative Investment Marketing in 2015, raising over £10 million to support the further development of its e-commerce platform, additional marketing initiatives, pay down debt and extend its range of products.

Seneca invested £1.25 million as a part of this fundraise. We believed this to be a good investment due to:

- The quality management team. Led by Andrew Wass, the team had extensive experience in retailing musical instruments and equipment;
- The company's track record of success with long term revenue and market share growth; and
- The company's offering of both well-known and self-branded music products, offering consumers choice and helping drive profitability

In 2016, the company opened distribution centres in Sweden and Germany to support growth in Europe and Scandinavia. In 2017, the company's annual revenue surpassed £50 million with sales having more than doubled since its IPO.

In 2018, we sold our holding realising £6.5 million which represented a tax-free return of c. 5.2x for investors before costs, excluding any tax reliefs.

Collagen Solutions PLC

Collagen Solutions PLC is a global supplier, developer and manufacturer of medical grade collagen, tissues and related medical devices and components for use in regenerative medicine, medical devices and in-vitro diagnostics and research. The company's products are used in a wide variety of applications including orthopaedics, cardiovascular, dental, plastic surgery, wound healing, neurology and urology. The initial investment was sourced through Seneca's vast network of AIM investors and advisors, receiving an early introduction to the business as a result of a strong existing relationship.

Seneca invested £2.2m across two funding rounds, firstly at IPO in 2014 and subsequently supporting the business as it looked to accelerate its core biomaterials and tissue business through a secondary fundraise in 2017. The capital raised propelled the business forward, allowing it to progress with a number of major projects, culminating in a £30m takeover approach made by US agriculture and food production company Rosen's Diversified.

The transaction validated the initial Seneca investment thesis which was focussed around the company's strong suite of IP, impressive client base and strong reputation in a growing market, supported at the time by the Chairman who was also investing personally and with whom Seneca held a pre-existing relationship. The exit resulted in a blended return of 1.3x for Seneca's EIS funds, with over 90% of the exit proceeds being achieved within 4 years of initial investment in the company.

SkinBioTherapeutics plc

SkinBioTherapeutics plc is a life science company, which focuses on skin health. It offers SkinBiotix®, a technology platform based on microbiome research which comprises extracts of probiotic bacteria for skin application. The technology targets the following skin healthcare sectors: cosmetics, infection control, and eczema/psoriasis. The platform was spun out of the University of Manchester in March 2016 having been funded by OptiBiotix PLC, a pre-existing Seneca EIS portfolio company.

In line with the initial investment case, the business has since demonstrated effectively that the SkinBiotix® platform can improve the barrier effect of skin models, protect skin models from infection and repair skin models. The company's studies have shown that the SkinBiotix® platform has beneficial attributes applicable to improving the barrier effect of skin models, protecting skin models from infection and repairing skin models. These are applications that are relevant across a vast array of treatments, each one providing a potential route into a substantial global market and as a result each milestone achieved by the business has been well received by the market.

Seneca corner-stoned the company's admission to AIM in April 2017 with an investment of £1.5m at 9p per share and has subsequently supported the business across two follow-on rounds both raised at 16p. The business has grown and matured throughout Seneca's investment period with the share price performing impressively during that time. At the time of writing, Seneca have partially exited their first investment round at a blended return of over 3x.

Premier Technical Services Group PLC ("PTSG")

PTSG supplies façade access and fall arrest equipment services, lightning protection and electrical testing, specialist building access and fire solutions.

Seneca recognised the potential of the business, which was a great fit being regionally based with a strong management team and a clear strategy. Seneca provided growth capital to support PTSG's initial public offering in February 2015.

Seneca's investment enabled the company to implement its strategy of complimentary business acquisitions and winning high-profile contracts with clients such as HSBC, NHS, Marks & Spencer and Manchester Airport. As a result, PTSG grew its revenues to £53m with an adjusted EBITDA of £12.3m and its market capitalisation to approximately £200m.

Seneca used its relationship with the broker market to exit its investment in PTSG in 2018, delivering a tax-free return of c. 3.5x for investors before costs, excluding any tax reliefs.

None of these examples should be taken as a recommendation or suggestion that you buy or sell shares in any of these companies.

Past performance is not a guide to future returns. Your capital is at risk and you may get back less than you invest.

Oversight of the Fund

Whilst the Fund Manager is responsible for making and managing the investments we make, the Investment Committee provides ongoing advice and keeps the Fund's investment policies, strategies, transactions and performance under continuous review.

Investment Committee

Richard Manley

Richard is a Co-founder and Managing Partner of Seneca Partners. Richard sits on Seneca Partners' Board of Directors and plays a pivotal role in new product launches. In addition, Richard represents Seneca as a Non-Executive Director on a number of Seneca Investee companies. Richard has extensive private equity and lending experience having previously worked for KPMG, NM Rothschild and Cenkos Fund Managers. Richard is a Chartered Accountant and holds a BSc (Hons) in Mathematics from the University of Birmingham.

.....

Ian Currie

Ian is a Co-founder and Senior Partner of Seneca Partners and is the Chairman of the Investment Committee. Ian sits on Seneca Partners' Board of Directors and brings with him extensive corporate finance and investment experience built up over many years in the finance sector including time at KPMG, Peel Hunt & Co, Apax Partners & Co and Altium Capital in addition to co-founding Zeus Group. Ian is a Chartered Accountant and also sits on the board of Hedley & Co Stockbrokers.

Decisions of the Investment Committee and recommendations to the Fund Manager will be made only with the consent of at least two members of the Committee. Should any member of the Investment Committee be unable to attend a meeting, their views will be sought in advance and conveyed to other committee members during the meeting. The committee may seek advice from an Advisory Partner on a deal by deal basis, where it is believed their input and involvement will be beneficial.

Tim Murphy

Tim is a Co-founder of Seneca Partners. Tim is ACIB qualified and has over 30 years structured finance experience, including being a member of a major banks Credit Committee. Tim also has experience of fund raising for MBOs and EIS qualifying companies. Tim represents Seneca as a Non-Executive Director on a number of Seneca Investee companies.

.....

Fund Manager

Matt Currie

As Fund Manager, Matt actively monitors our existing portfolio, conducts due diligence on potential investee companies and is part of the deal execution team on new investments. Previously he gained experience at Deloitte and within the Structured Finance Team at RBS. Matt is an ACA qualified Chartered Accountant and has a degree in Business Management & Finance from the University of Manchester. Matt also holds the CFA Investment Management Certificate.

Frequently asked questions

Q: How much can I invest?

The minimum amount for your first investment into the Fund is £20,000. For any subsequent investment, the minimum is £5,000. The money you invest into the Fund is referred to as your "Subscription".

Whilst the Fund does not have a maximum Subscription, you should be aware that there is a £1 million limit on how much you can invest in EIS qualifying shares in any Tax Year. (This maximum increases to £2 million for "knowledge intensive" investments).

Q: Does the Fund pay an income?

The tax reliefs available under the Enterprise Investment Scheme are most effective when investing for growth. Any income received (such as dividends) will be subject to tax. Whilst the Fund therefore does not invest with the aim of generating income, it is possible that an investee company may pay dividends.

For smaller amounts, any dividends will be held in your cash account with the Custodian of the Fund and paid to your bank account when we sell your holding in the company that paid the dividend. For larger amounts, we will contact you to arrange to have the dividend transferred to your bank account.

Q: Is the target return of 1.5x guaranteed?

No it is not. Any return you receive may be lower or higher. Please note that this is a high risk investment where capital is at risk and your investment may fall significantly in value.

Q: Will my Subscription be invested immediately?

It usually takes up to 12 months to have your money invested.

Please refer to the 'Buying Shares' section on page 29 for further details.

Q: When will I receive my share certificates?

You will not receive shares certificates for any investment made for you within the Fund, as your shares are held by a Nominee on your behalf.

Q: Do I control my shares?

Whilst your shares are held by a Nominee, you are the beneficial owner for legal and tax purposes. However, day to day decisions relating to your shares (such as the exercising of voting rights) will be made by Seneca on your behalf, in accordance with the Terms and Conditions of the AIM EIS Fund.

Q: Who are the Custodian and the Nominee?

Prior to shares being allotted, your Subscription will be held by a third-party custodian, Woodside Corporate Services Limited ("Woodside").

Woodside is a company registered in England and Wales, whose registered office is at 4th Floor, 50 Mark Lane, London EC3R 7QR and which is authorised and regulated by the Financial Conduct Authority reference 467652).

As is normal in such cases, Woodside will use its non-trading subsidiary WCS Nominees Ltd to act as the Nominee, holding shares in the relevant Investee Companies on your behalf.

Q: When will the three-year qualifying period for EIS tax reliefs start?

In the normal course of events, this period starts on the date on which the investee company's share register records that your shares have been allotted to you. The exception is where a company is not undertaking a qualifying trade on the date the shares are allotted to you. In such cases, the starting date is the date on which that company commences a qualifying trade.

Q: When will the two-year qualifying period for Business Relief start?

This period starts on the date on which the investee company's share register records that your shares have been allotted to you.

Q: How often do you value my portfolio?

We will update the value of your shares shown on our Online Portal each working day to reflect the mid-price quoted on the Alternative Investment Market at the close of business on the previous working day. If a company is suspended from trading, we will use the latest share price quoted on AIM.

Q: How do I follow the progress of my investment?

We will issue two statements each year, giving the value of your investment as at 5th April and 30th September. These statements will include updates on the companies in which you are invested and will usually be issued within six weeks of the given date. We can also provide you and your financial adviser with access to our Online Portal. Allowing you and your adviser to view the current value of your investments at any point in time, download

statements and copies of previously issued contract notes and EIS 3 certificates.

Q: Who is the Depositary for the Fund?

The Depositary is Thompson Taraz Depositary Ltd, 4th Floor, Stanhope House, 47 Park Lane, London, W1K 1PR. The Depositary will perform investment audits which will include cash monitoring, asset verification and a check of the systems and controls for the Fund.

Q: How long will my money be invested?

You need to own shares for at least 3 years (sometimes longer) as one of the conditions of you receiving any tax reliefs available under the Enterprise Investment Scheme. However, you should expect to hold the shares in your portfolio for an average of 4 to 6 years. There may be occasions where we are able to sell some of your shares sooner than this but equally there may be occasions where it takes longer to find a buyer for your shares.

Q: Will exit proceeds be automatically reinvested?

In most cases the default position will be that we will automatically reinvest any exit proceeds within 12 months as a part of the next available investment tranche. However, as each exit occurs, you will be given the opportunity to ask to have the proceeds returned to you.

Q: Can I sell my shares when I want?

In the normal course of events, the decision to sell shares lies solely with the Fund Manager. You can of course make a request that we sell any shares you hold for the Fund Manager's consideration.

Fees and charges

Fees Paid at Outset

The following fees are paid by you by deduction from your Subscription:

An initial fee paid to Seneca Partners. This fee is either:

- **2.0% + VAT*** (where you have received advice from a financial adviser); or
- **5.0% + VAT*** (where no financial advice has been received).

For any exit proceeds achieved in and reinvested in the Fund, this initial fee is reduced to 1.0% + VAT.

The Custodian's administration fee (£175 + VAT).

Woodside (the custodian for the Fund) charges an annual administration fee of £35 + VAT. The sum of £210 (being £175 + VAT) is set aside from your Subscription to cover this fee for the first five years. This is charged "per investor" so if you make any further investments into the Fund, we may only need to set aside a lower amount to top up the total amount set aside.

Any advice fees you ask us to pay to your financial adviser

If you ask us to, we can facilitate the payment of advice fees to your financial adviser up to a maximum of:

- **3.0% + VAT*** as an upfront one-off payment; and/or
- **1.0% + VAT*** as an annual ongoing payment (for a maximum of four years).

*** These fees are calculated as a percentage of your Subscription.**

Transaction Fees

The Custodian's dealing fee is either:

- **Up to 0.1% + VAT** of the value of any shares in that are bought or sold; or

The Broker's fee is:

- **0.2%** of the value of any shares sold (subject to a minimum fee of £35 per transaction at Fund level).

A PTM levy of up to £1 may also be charged where shares are sold.

Ongoing Fees

No annual management charge

We will not charge an annual management charge.

The custodian's annual administration fee (£35 + VAT).

This will only apply if you continue to hold cash or shares within your portfolio after the 5th anniversary of your Subscription.

Realisation Fee

As shares are realised, a fee of 4% + VAT will be charged on the proceeds realised prior to the deduction of the dealing and broker fees detailed on the previous page.

Performance Fee

Performance Fee 20% + VAT

This is only charged on any Exit Proceeds that exceed the amount needed to repay the Investment Amount.

Treating Customers Fairly

The fair treatment of customers is central to our corporate culture. All investors will be treated with equal consideration, with none given preference over others. All of the products and services we offer are designed to meet the needs of identified consumer groups and are targeted accordingly. (Our target market for this Fund is detailed on page 8).

Our goal is to provide you with clear information and ensure you are kept appropriately informed before, during and after the point at which you invest. Whilst we are unable to offer you any legal, financial or taxation advice, we make every effort to ensure that any investment you make with us is appropriate for you. To help us do this, our application includes certain questions about your financial position, your knowledge and experience, your investment objectives and attitude to risk. We would also encourage you to seek advice from a financial adviser before making an investment.

Our processes and procedures are intended to ensure that the service you receive from us as Fund Manager is, at the very least, of an appropriate standard and in line with what we have set out in this document and our Terms and Conditions. This includes ensuring that we impose no unreasonable barriers following your investment should you seek to change product, switch provider or make a complaint.

Risk factors

Investing in the Seneca AIM EIS Fund may not be right for you. Please ask your financial adviser if this investment is suitable for you and think carefully about the risks involved with your investment.

The following pages outline what we believe to be the key risks of investing in the Fund.

You may lose money

There is a high risk of capital loss when investing in smaller companies. You may therefore get back less than you invest or no return at all.

Growth is not guaranteed

The Fund targets a return of 1.5x the amount invested in shares on your behalf net of fees, excluding any fees or any tax reliefs you may receive. However, this is not guaranteed and it is possible that your investment may fall in value. Past performance should not be taken as an indication of what the performance might be in the future.

It may take longer than you expect to invest your money

There is a risk that we may be unable to find a sufficient number of suitable investment opportunities to meet investor demand. If that is the case, your Subscription may not be fully invested within 12 months of you paying it. In addition, it may lead to your Subscription not being invested in the Tax Year you intended and therefore any EIS tax reliefs not being available when expected or at all. If there is a delay in investing your money, it may also lead to it an eventual exit being further in the future than you originally expected.

Your investment may fluctuate in value

Investments in AIM quoted companies are likely to be more volatile and present a higher degree of risk to your capital than those on the London Stock Exchange official list.

It may take longer than you expect to sell your shares

It may be possible to trade shares that are quoted on the Alternative Investment Market. However this is dependent upon there being a buyer willing to purchase your shares. You should consider an investment in the Fund to be for a 4 year period although it may take longer to exit your investment.

Your investment may not be diversified

In the normal course of events, your portfolio will contain shares in 5 or more different companies. Whilst we will endeavour to have your portfolio include shares in companies from different industry sectors, this may not be possible. Individual investee companies will be subject to the risks associated with the sector that they trade in and therefore the value and saleability of their shares will be affected by events that affect their whole sector.

EIS legislation may change

Rates of tax, tax benefits and allowances described in this document are based on current legislation and HMRC practice and depend on personal circumstances. These may change from time to time and are not guaranteed. Seneca Partners Ltd does not provide financial or taxation advice and therefore recommends that potential investors seek advice from a financial adviser before making an investment.

An investment in a company may lose or not obtain EIS Approval

We will only invest your money in companies whose shares we reasonably believe will be EIS qualifying. Whilst Advance Assurance will be sought from HMRC before we make an investment, it does not guarantee that they will grant EIS status once an investment has been made. Even after HMRC have granted EIS status and allowed the issue of your EIS 3 certificate, there is no guarantee that your investment will maintain its qualifying status. For example, a company might cease to carry on a qualifying trade during the three year EIS qualification period. In addition, if a company does not employ the funds made available to it within the deadlines set out in the EIS rules, it would be in breach of those rules and the tax advantages would be withdrawn. A failure of a company to continue meeting the EIS qualification requirements would likely result in you being required to repay any Income Tax relief received after purchasing the shares (plus interest on the same), a liability to Capital Gains Tax on any gain made upon disposal of the shares and any deferred gain crystallising and falling due for payment. In addition, where your shares

are sold at a loss, your ability to claim loss relief against Income Tax may be affected.

Early Exit

In certain circumstances, shares may be sold before you have held them for three years. For example, this can happen where the investee company is subject to a takeover or where the Fund Manager believes doing so is in line with our goal of maximising investor returns. If this occurs, the tax reliefs and tax benefits of EIS investment will be lost in relation to the shares sold. If a company buys back its own shares If your shares are purchased by the investee company within 5 years of you buying them, you will be taxed on any profit made at the same rate as would apply to dividends.

UK tax payers only

The Seneca AIM EIS Fund has been designed with UK resident taxpayers in mind. If you are not resident or ordinarily resident in the UK for tax purposes, it is not appropriate or advantageous for you to invest in the Seneca AIM EIS Fund.

Conflicts of interest

Conflicts of interest may occur between a customer and Seneca, including our managers, employees, appointed representatives, clients of appointed representatives or any other persons directly or indirectly linked to us; or between two or more clients.

Treating Customers Fairly is central to our core values. We have an embedded culture that understands what is acceptable and what is unacceptable behaviour. As such, conflicts of interest and the identification / management / mitigation thereof are central to this philosophy and culture.

Whilst undertaking our usual activities and services, an actual or potential conflict may arise when our interests and those of our clients are directly or indirectly in competition. Here are some examples of circumstances in which general types of potential conflicts of interest may arise:

- We undertake investment business for other investors;
- A transaction is affected on your behalf in securities in which Seneca Partners Ltd (or a director or employee of ours) is also trading or has previously traded or has a long or short position;
- We may, when acting on your behalf, match an order for you with an order for another investor for whom we are also acting as agent.

How do we manage conflicts of interest?

We have put a number of systems and controls in place to ensure investors are always treated fairly. It is not always possible to prevent actual conflicts of interest from arising. In that case, we will try to manage the conflicts of interests in a number of ways. These include any or a combination of:

- Segregating duties;
- Establishing Chinese Walls;

- Deciding that the individual dealing with the conflict is sufficiently independent to not be influenced by the conflict; and/or
- Informing the client of the conflict so he/she can make a decision on the conflict.

In certain circumstances, Seneca may have to decline to take on a new client or transaction.

Conflicts committee

Our Risk, Conflicts and Compliance Committee examines any potential conflicts. It considers proposals that could give rise to conflicts of interest and decides whether, in light of the conflicts, the basis of the proposals is appropriate. Their role is to ensure that despite the existence of conflicts of interest, we never compromise the fair treatment of our investors. All conflicts are reported to Seneca's Board of Directors for challenge and sign off.

We take the management of any potential conflicts of interest very seriously and in certain circumstances, for example where we believe the consequences of a conflict of interest does or will create client detriment, will decline to take on a new client or transaction, as appropriate.

We update our Conflicts of Interest Policy and Register of Potential Conflicts of Interest as necessary on an ongoing basis and formally review our arrangements quarterly.

Making your investment

We recommend that you seek independent financial advice before you invest in the Seneca AIM EIS Fund.

Please make sure that you have fully read and understood this Information Memorandum.

Please read our Terms and Conditions applicable to the AIM EIS Fund (You can download a copy from our website or request a printed copy from our Client Relationship Team). By completing an Application Form you are agreeing to our Terms and Conditions as an investor.

Please also read our Custodian's Terms of Business. You can download a copy from our website or request a printed copy from our Client Relationship Team. By completing an Application Form you are also agreeing to the terms and conditions contained in that document.

To make your investment into the Fund, please complete and return the appropriate Application Form to:

Woodside Corporate Services Limited
4th Floor, 50 Mark Lane, London, EC3R 7QR

Our Client Relationship Team can also be reached on **01942 295985**
or at **clientteam@senecapartners.co.uk**

If you wish to invest by cheque, please make it payable to:

'WCSL Seneca AIM Client Acc' and include it with the Application Form.

If you wish to invest by bank transfer, please use the following bank details:

Account Name: WCSL Seneca AIM Client Acc
Sort Code: 80-20-00
Account Number: 10433868
Reference: Investor's surname followed by initial(s)*
*For example, John Edward Smith would be 'Smith JE'

If you are investing by bank transfer, you can send your application by email to: **applications@woodsidesecretaries.co.uk** rather than posting it. Please note that we can only accept scanned applications emailed by you (from your email address provided on your application form) or your financial adviser.

Please note that photographs of application forms cannot be accepted and we cannot invest your money until we have received your application.

To assist us with meeting our anti-money laundering obligations, we and our Custodian will attempt to verify your identity electronically. If we are unable to do so, we will need you to provide certain documentation. Details are included in the Application Form.

After you have invested

Once we receive your application

We will write to you and your financial adviser to let you both know that we have received your application form. If we or our Custodian need any further information, we will let you know at the same time.

Buying shares

When you subscribe to the Fund, your Subscription will be held in cash by the Custodian, helping build a sum of money for the Fund to invest (an "investment tranche"). Your investment will form a part of the next "soft close" (or the final "investment tranche" if the fundraising is complete) so that we can start making investments for you.

EIS 3 certificates

The companies in which you are invested can only apply to HMRC for permission to issue your EIS 3 certificate after your shares have been allotted. (They must also have been undertaking a qualifying trade for at least 4 months before doing so). It can take HMRC some time to issue permission for a company to issue EIS 3 certificates. We expect most of your EIS 3 certificates will be issued within 6 months of the date your shares are purchased but it can take longer. Rest assured that we will forward any EIS 3 certificates to you as soon as we receive them.

We will also upload a copy of any EIS 3 certificates onto our secure online portal, where you and your adviser can access them, if you wish.

Keeping you up to date

We will issue two statements each year, giving the value of your investment as at 5th April and 30th September. These statements will include updates on the companies in which you are invested. Please allow up to six weeks for each statement to arrive.

We can also provide you and your financial adviser with access to our Online Portal. This will allow you and your adviser to view your investment at any time, download a current valuation or any previously issued statements and access copies of any contract notes and EIS 3 certificates that have been issued.

If you have any queries, please contact our **Client Relationship Team** at **clientteam@senecapartners.co.uk** or on **01942 271746**.

Definitions

Alternative Investment Fund (AIF)

A collective investment that raises capital from a number of investors, with a view to investing it in accordance with a defined investment policy for the benefit of those investors. An AIF is not a UK UCITS.

AIM

The Alternative Investment Market.

Applicable Laws

Relevant UK laws and FCA Rules.

Associate

Any person or entity who is under the control of another person or entity.

CGT Deferral

Relief EIS reinvestment (deferral) relief for chargeable capital gains under section 150C and schedule 5B of the Taxation of Chargeable Gains Act (1992).

CGT

Capital Gains Tax.
